

LIGHTHOUSE IMAGING

EndoScan™

Check for endoscope lens
damage in seconds

EndoScan, the improved endoscope lens tester from Lighthouse Imaging, is designed to accurately and safely assess the inner surfaces of all diameters and lengths of rigid endoscopes.

Because precision
is everything

EndoScan™

EndoScan checks for endoscope lens damage in seconds

- Analyzes problems with rigid endoscope lenses
 - Cracked relay lenses
 - Moisture in optical system
 - Dirt on surfaces
 - Adhesive Degradation
- Precision glass imaging lens for the clearest view of endoscope interior
- Accepts all DIN standard endoscope eyepieces
- Locking eyepiece attachment prevents possible damage during testing
- Adapts to standard endoscopic video cameras for documentation

Specifications

- Non-marring positive eyepiece clamp
- Position slide lock with 0-60mm scale
- Endoscope diameter range: unlimited
- Endoscope insertion length range: unlimited

We set a higher standard.

Lighthouse Imaging Corporation has developed endoscopic equipment for leading manufacturers and hospitals since 1984. We are an award-winning provider of optical engineering and design services for the medical device industry with more than 15 patents issued. Our NIST-traceable test equipment is manufactured in the United States at our ISO 9001/13485 certified facility.

Please contact us so we can help you simplify your endoscope testing.
